

Phan Thi Ha Duong

1. (with E. Goles and M. Morvan) About the dynamics of some systems based on integer partitions and compositions. In: *Formal power series and algebraic combinatorics* (Moscow, 2000), 214 - 225, Springer, Berlin, 2000.
2. (with M. Latapy; R. Mantaci and M. Morvan) Structure of some sand piles model. *Theoret. Comput. Sci.* **262** (2001), N^o 1-2, 525 - 556.
3. (with M. Latapy) The lattice structure of chip firing games and related models. *Phys. D* **155** (2001), N^o 1-2, 69 - 82.
4. (with K. Bertet; D. Krob; M. Morvan; J.-C. Novelli and J.-Y. Thibon) An overview of λ -type operations on quasi-symmetric functions. Special issue dedicated to Alexei Ivanovich Kostrikin. *Comm. Algebra* **29** (2001), N^o 9, 4277 - 4303.
5. (with C. Magnien and L. Vuillon) Characterization of lattices induced by (extended) chip firing games. In: *Discrete models: combinatorics, computation, and geometry* (Paris, 2001), 229 - 244 (electronic), Discrete Math. Theor. Comput. Sci. Proc., AA, Maison Inform. Math. Discret. (MIMD), Paris, 2001.
6. (with E. Goles and M. Morvan) The structure of a linear chip firing game and related models. *Theoret. Comput. Sci.* **270** (2002), N^o 1-2, 827 - 841.
7. (with E. Goles and M. Morvan) Sandpiles and order structure of integer partitions. *Discrete Appl. Math.* **117** (2002), N^o 1-3, 51 - 64.
8. (with E. Goles and M. Morvan) Lattice structure and convergence of a game of cards. *Ann. Comb.* **6** (2002), N^o 3-4, 327 - 335.
9. (with E. Thierry) Dynamics of the picking transformation on integer partitions. In: *Discrete models for complex systems, DMCS '03 (Lyon)*, 43 - 56 (electronic), Discrete Math. Theor. Comput. Sci. Proc., AB, Assoc. Discrete Math. Theor. Comput. Sci., Nancy, 2003.
10. (with E. Goles; M. Latapy ; C. Magnien and M. Morvan) Sandpile models and lattices: a comprehensive survey. *Theoret. Comput. Sci.* **322** (2004), N^o 2, 383 - 407.
11. (with E. Duchì; R. Mantaci and D. Rossin) Bidimensional sand pile and ice pile models. *Pure Math. Appl. (P.U.M.A.)* **17** (2006), N^o 1-2, 71 - 96.
12. (with L. M. Ha) Strict partitions and discrete dynamical systems. *Theoret. Comput. Sci.* **389** (2007), N^o 1 - 2, 82 - 90.
13. Two sided sand piles model and unimodal sequences. *Theor. Inform. Appl.* **42** (2008), N^o 3, 631 - 646.
14. (with L. M. Ha) Integer partitions in discrete dynamical models and ECO method. *Vietnam J. Math.* **37** (2009), N^o 2-3, 273 - 293.
15. (with M. Latapy) The lattice of integer partitions and its infinite extension. *Discrete Math.* **309** (2009), N^o 6, 1357 - 1367.
16. (with L. M. Ha, P. T. An) On the relation between chip firing games and Petri nets. In: *Proceeding of IEEE-RIVF International Conference on Computing and Communication Technologies.* (2009), 328 - 335.
17. (with L. M. Ha, N. A. Tam) Algorithmic aspects of the reachability of conflicting chip firing game. *Advances in Intelligent Information and Database Systems in series Studies in Computational Intelligence.* **283** (2010), 359 - 370.

18. (with L. M. Ha) Order structure and energy of conflicting chip firing game. *Acta Math. Vietnam.* **35** (2010), 289 - 301.
19. (with T. T. T. Huong) On the stability of sand piles model. *Theoret. Comput. Sci.* **411** (2010), N^o 3, 594 - 601.
20. (with M. Latapy, C. Crespelle and N. T. Quy) Termination of multipartite graph series arising from complex network modelisation. In: *The 4th Annual International Conference on Combinatorial Optimization and Applications (COCOA'10)*, December 18-20, 2010, in The Big Island, Hawaii, USA.
21. (with N. N. Doanh, N. N. Anh, A. Drogoul, and J. -D. Zouker) Disk graph-based model: a graph theoretical approach for linking agent-based models and dynamical systems. In: *Proceeding of IEEE-RIVF, International Conference on Computing and Communication Technologies.* (2010).
