

1. (with N. T. Cuong) On the partial Euler-Poincare characteristic of certain systems of parameters in local rings. *Math. Z.* **222** (1996), 383 - 390.
2. (with N. T. Cuong) A lower bound for index of reducibility of parameter ideals in local rings. *Vietnam J. Math.* **25** (1997), N<sup>o</sup> 4, 341 - 347.
3. (with N. T. Cuong) Modules whose local cohomology modules have Cohen-Macaulay Matlis duals. In: *Proceedings of Hanoi Conf. on Commutative Algebra Algebra Geometry and Computational Methods*, Editor by D. Eisenbud, Springer Verlag, 1999, 223 - 232.
4. A cut-and-paste method for computing the Seifert volumes. *Math. Ann.* **326** (2003), N<sup>o</sup> 4, 759 - 801.
5. On the symplectic volume of the moduli space of polygons. *Vietnam J. Math.* **33** (2005), [Special Issue](#), 109 - 111.
6. On the symplectic volume of the moduli space of spherical and Euclidean polygons. *Kodai Math. J.* **28** (2005), N<sup>o</sup> [1](#), 199 - 208.
7. On the  $\mathrm{SU}(2,1)$  representation space of the Brieskorn homology spheres. *J. Math. Sci. Univ. Tokyo* **14** (2007), N<sup>o</sup> [4](#), 499 - 510.
8. On the integral of  $\log x \frac{dy}{y} - \log y \frac{dx}{x}$  over the A-polynomial curves. *Acta Math. Vietnam.* **33** (2008), N<sup>o</sup> [3](#), 519 - 528.
