

Curriculum Vita & Publication List

PROF. DSc. DO NGOC DIEP

Family Name: Do **First Name: Diep** **Middle Name: Ngoc**
Date and Place of Birth: August 10, 1950; Hung Yen, Vietnam
Title · Degrees: Full Professor (1996) · PhD. (1977)
and Doctor of Sciences (1995)
Citizenship: Vietnamese
Position: Senior Researcher · Head (1984-2000, 2007-2010)
Dept. of Topology and Geometry
Current Position: Since 2017: Researcher & Lecturer, TIMAS,
Thang Long University
co-worker at Institute of Mathematics,
Vietnam Academy of Science and Technology
Editors: Editor (1996-2000). *Vietnam Journal of Mathematics*
Deputy Editor in Chief (2008-2012). *Vietnam Journal*
of Mathematics
Editor (2012-2015). *Vietnam Journal of Mathematics*
Deputy Editor in Chief (1998-2000). *Acta Mathematica*
Vietnamica
Editor. *Scientific Journals International*
Editor (2010). *International Journal of Mathematical*
Modeling and Numerical Optimisation
Editor (2010-2012). *Journal of Statistics and Mathematics*

Specific Field

of Work: Quantization and KK-Theory invariants of Group C^* -Algebras and Quantum Groups. Harmonic Analysis on reductive groups. Quantum Computing. Quantum Artificial Intelligence.

Permanent Address: TIMAS, *Thang Long University*
Nghiem Xuan Yem road, Hoang Mai, Hanoi, Vietnam

1 Academic Degrees and Titles

Degrees and Titles	Year	Institution
High School	1968	Hanoi University Special Mathematical School
M.S./M.A.	1974	Moscow University
Ph.D.	1977	Moscow University
Professor	1991	Education Ministry of Vietnam
DS.c.(Habilitation)	1995	Institute of mathematics · NCST of Vietnam
Full Professor	1996	Education Ministry of Vietnam

2 Former and Present Professional Positions and Fellowships

Date	Title	Place
1978 - ...	Membership	Institute of Mathematics
1981 - 1984	Deputy Head	Department of Topology and Geometry; Inst. Math. NCST of Vietnam
Nov. 1982 – Dec. 1983	IHES Fellow	Institut des Hautes Etudes (IHES); Bures s/Yvettes France
1984 - 1986	Secretary	Scientific Council; Inst. Math., NCST of Vietnam
1984 - 2000	Head	Department of Topology and Geometry; Inst. Math. NCST of Vietnam
Oct.1987 - Nov. 1989	Visiting Scientist	Moscow University
1991	Professor	Education Ministry of Vietnam
Aug.1991 - Apr. 1993	AvH Fellowship	Alexander von Humboldt Fellow Bielefeld University and Heidelberg University
May 1993 - July. 1993	C3 Professor	Techische Hochschule Darmstadt and Heidelberg University
1996-...	Full Professor	Education Ministry of Vietnam
1996- ...	Senior researcher	Institute of Math., NCST of Vietnam
Aug. 1996 - Oct. 1996	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
Nov. 1996 - Jan. 1997	Visiting Professor	Univ. Paris, Nantes, Toulouse, Marseilles, Nice ; France
Aug. 1997 - Sept. 1997	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
Nov. 1997 - March 1998	Visiting Professor	Diliman University of the Philippines
June. 1998 - Sept.1998	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
August 1999 - May 2001	Full professor	Department of Mathematics, The University of Iowa, USA

June 2001 - Sep. 2001	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
July 2004 - August 2004	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
Nov. 2006 - Dec. 2006	Visiting Professor	Diliman University of The Philippines
June 2007 - July 2007	Visiting Professor	International Center for Theoretical Physics (ICTP), Trieste, Italy
Since 2017	lecturer	Thang Long University

6 A Brief Summary of My Researches

My research interest is to solve problems from the problem of Noncommutative Geometry: characterizing the structure of Lie group and through it group algebras, description of irreducible representations via quantization and automorphic representations and spectral decomposition of some concrete representations. It involves the ideas from quantum physics and quantum information sciences.

6.1 Structure of Group C^* -algebras via KK-theory

At first I was interested in characterizing the group C^* -algebras of some Lie group via invariants in KK-theory. For some classes of solvable Lie group the problem was successfully solved with the invariants from KK-theory.

6.2 Group representations and Quantization

After that I was interested in to describe possibly all irreducible unitary representations of some classes of Lie groups. It was done with the generalized quantization procedure in multidimensional cases.

6.3 Discrete subgroups of Lie groups

The theory of representations becomes more delicate in the cases of representation, twisting from some discrete subgroup of the Lie groups. I was interested in the case of Langlands type discrete subgroups of reductive groups.

6.4 Automorphic representations of reductive groups

The discrete part of the dual of Lie groups becomes more interesting in the frame of Langlands programs. I was interested in to describe the concrete transfer to endoscopic subgroups. My ideas was related with the Poisson summation formula in general context.

6.5 Quantum computing

An important application of the representation theory is quantum computing protocols. I worked out some quantum code related with the problem of finding Hamiltonian circuits, salesmen, finding sample in pictures and also application to the accounting problems.

6.6 Quantum artificial intelligence

Quantum artificial intelligence is studied from the point of view of statistical learning by using the tests as the training rules quantum neural networks. I worked out the quantum neural networks like: quantum least square quantum neural networks (LS-QNN), polynomial interpolation quantum neural networks (PI-QNN), the parametrico-statistical test quantum neural networks like: linear regression neural networks (LR-QNN), polynpmial regression quantum neural netowrks (PR-QNN), chi-squared test quantum neural networks (χ^2 -QNN), linear nonparametrix regression neural networks (LNR-QNN), polynpmial nonparametric regression quantum neural netowrks (PNR-QNN), spline smoothing of regression quantum neural networks (SSR-QNN), k nearest neighbor quantum neural networks (k NN-QNN).
